EDUCATION

KJ Somaiya Institute of Technology

Nov 2022 – Present

Languages and Technologies:

HTML, CSS, JavaScript, SQL, Python, Machine Learning, Artificial Intelligence, Generative AI, Computer Vision

Tools & Platforms:

Power BI, Microsoft Excel, Tableau, AWS (EC2, S3, ECR), Git & GitHub (Version Control), Docker, MLflow, DVC

INTERNSHIPS

1) CodSoft – Machine Learning Intern

Jan 2025 – Feb 2025

- Engineered end-to-end machine learning projects, including a Movie Recommendation System, Customer Churn Prediction, and Spam Detection using Python, Scikit-learn, and Pandas.
- Executed the full ML lifecycle: data preprocessing, feature engineering, model training, performance evaluation, and deployment preparation.

2) Prodigy – Web Development Intern

Aug 2024 – Sept 2024

- Developed responsive web applications such as a Weather App, Digital Clock, and Personal Portfolio using HTML, CSS, and JavaScript.
- Enhanced frontend development skills and deepened understanding of UI/UX design principles through practical implementation.

PROJECTS

1) End-to-End Machine Learning [\[Github\]](#)

May 2025– June 2025

- Designed and implemented a complete machine learning pipeline to predict student math scores based on demographic and academic features.
- Executed data preprocessing, feature transformation using Column Transformer, and model training with hyperparameter tuning.
- Identified Linear Regression as the optimal model based on evaluation metrics and serialized it using Pickle for deployment.
- Developed a Flask-based web application featuring a clean, user-friendly interface to accept user input and deliver real-time predictions.

2) Chest Cancer Classification | MLflow, DVC, AWS, Flask [\[Github\]](#)

Jan 2025 – May 2025

- Built a complete machine learning pipeline with modular components for data ingestion, preprocessing, model training, and evaluation.
- Utilized **MLflow** for experiment tracking and **DVC** for data and model version control, ensuring reproducibility.
- Containerized the application using **Docker** and deployed it to **AWS EC2** via a fully automated **CI/CD pipeline** using **GitHub Actions**.
- Monitored model performance through the MLflow UI hosted on **DagsHub**, and pushed Docker images to **AWS ECR** for scalable deployment.

3) Data Analysis Project [\[Github\]](#)

Jan 2025 – May 2025

- Sales Data Analysis:** Cleaned and analyzed sales data using Pandas, uncovered trends in product performance and revenue, and visualized insights with Matplotlib.
- HR Analytics Dashboard:** Created a Tableau dashboard providing real-time insights into employee performance metrics, enabling managers to track progress against goals, facilitated more effective performance reviews for 100+ employees.
- SQL Music Analysis:** Queried music streaming data using MySQL to analyze song popularity, user behavior, and listening patterns across genres.

EXTRACURRICULARS & CERTIFICATIONS

Leadership:

- Chief Organizing Officer** – Institution of Engineering and Technology, KJSIT (Aug 2024 – Mar 2025)

Certifications:

- AWS Academy Graduate – AWS Training and Certification
- SQL (Intermediate) – HackerRank
- Generative AI Capstone – Techfusion
- Artificial Intelligence – Cursa
